Bengaluru , Karnataka, India – 560103

SUMMARY

Supply Chain & Operations Analyst with experience in inventory optimization, warehouse operations, ERP implementation, and process improvement. Led 10+ operational improvement initiatives that increased inventory accuracy to 97% and improved production visibility through QR-based tracking systems. Skilled in supply chain analytics, KPI reporting, and cross-functional coordination.

WORK EXPERIENCE

Flipkart | Bengaluru, India

July 2026 - Present

Executive

- Manage reverse logistics operations by monitoring return orders, coordinating pickups, and ensuring timely movement of returned inventory.
- Coordinate with warehouse, ground operations, sellers, and 3PL partners to ensure smooth and timely return-order processing.
- Identify and resolve operational issues including address mismatches, invoice discrepancies, pickup failures, and shipment exceptions.
- Monitor process performance to identify bottlenecks, recurring issues, and opportunities for operational improvement.
- Perform root-cause analysis and implement corrective actions to resolve recurring operational problems and improve process efficiency.

Bluewave Infotech | Chennai, India

Aug 2024 - July 2025

Inventory Analyst

- Led 10+ process improvement projects across procurement, production, inventory, and dispatch operations.
- Managed inventory using ERP systems, ensuring accuracy and timely replenishment.
- Implemented a QR-based tracking system for real-time visibility and reduced delays.
- Streamlined procurement–production–dispatch schedules, improving turnaround time.
- Designed an efficient order processing system, reducing cycle times.
- Prepared real-time documentation for forecasting and reporting.
- Managed end-to-end order management to ensure accurate and timely fulfilment.
- Managed warehouse operations handling inventory across multiple SKUs, ensuring accurate stock control and timely dispatch.

SKILLS

Professional skills: Supply Chain Management | Process mapping | Workflow mapping | Inventory Management | Operations Coordination | Root cause analysis | Process Improvement | Warehouse Operations | SOP Documentation.

Soft skills: problem solving | Adaptability | communication.

Tools & Technology: Microsoft office suits | Miro | ERP systems (Supply chain Management).

Familiarity: Mysql | Asana | Lean Six sigma | Kaizen| Strategic planning | AI Automation.

PROJECTS

- **End-to-End Inventory Tracking System Implementation** – Designed a QR-based ERP-integrated tracking system to Improved inventory accuracy from 85% to 97% and enhanced workflow efficiency.
- **Work in Progress (WIP) Tracking System Development** – Designed and deployed a real-time QR-based WIP tracker to improve production visibility and reduce bottlenecks.
- **IoT-Based Automated Plant Cultivation System** – Developed an IoT-enabled hydroponics system for real-time monitoring and automation of plant growth.
- **Entrepreneurial Project** – Skinnykart.com – Managed and optimized an e-commerce startup’s end-to-end supply chain, vendor coordination, and process automation.

EDUCATION

Bachelor of Electronics and communication Engineering

Aug 2021 - May 2024

St. Xavier’s catholic college of engineering

- Learned electronics with a focus on practical applications.
- **Final Year Project:** Built an IoT-based automated indoor plant cultivation system (Team Lead).

Diploma in electronic communication Engineering

July 2018 - May-2021

Morning Star Polytechnic College

ADDITIONAL INFORMATION

- **Languages:** English, Tamil, Malayalam.
- **Certifications:** Lean Six Sigma -White Belt, Supply Chain Management Fundamentals (SCMF).
- **Awards/Activities:** Vice chair in FOSSEE club, Treasury in YRC.
